Professional Summary

Android Developer with **1.5 years of experience** building and maintaining **native Android applications** using **Kotlin, Jetpack Compose, and MVVM architecture**. Skilled in developing **user-centric mobile experiences** with **Material Design** principles and performance-optimized code. Proven ability to collaborate across teams and deliver reliable, scalable apps with **Firebase, RESTful APIs, and CI/CD pipelines**.

Technical Skills

Languages: Kotlin, Java

Frameworks & Tools: Android SDK, Jetpack Compose, Jetpack Libraries

Architecture: MVVM, Clean Architecture

Databases: Room, SQLite

APIs: RESTful APIs, Retrofit, OkHttp

Cloud & Backend: Firebase (Auth, Firestore, Analytics, FCM), AWS S3, Supabase, MongoDB

DevOps: Git, GitHub Actions (CI/CD)

Testing: JUnit, Espresso

Other: Coroutines, Flow, Material Design, Agile/Scrum, Jira, Slack

Professional Experience

Argon IT Services llp, Surat | Jun 2024 – Present

- Developed and deployed 6+ Android apps using Kotlin and Jetpack Compose, achieving average ratings of 4.6+ stars and 50K+ downloads on Google Play.
- Reduced app crash rate from 5.8% to 0.7% by implementing comprehensive error handling and automated testing (JUnit, Espresso).
- Integrated Firebase Cloud Messaging and Analytics, boosting user engagement by 20% via personalized notifications.
- Built RESTful API connections with Retrofit and OkHttp, reducing API response time by 35% using caching strategies.
- Collaborated with UI/UX designers to apply Material Design 3 principles, improving user satisfaction scores by 18%.
- Automated the CI/CD pipeline using GitHub Actions, reducing deployment time from 1 week to 2 days.
- Participated in code reviews and pair programming, identifying and resolving 80+ potential bugs before release.

Education

Bachelor of Computer Application

June 2022 - June 2025

SDJ International College, (Veer Narmad South Gujarat University), Surat

Certifications

- Java & Kotlin Programming for Beginners
- The Complete Android Developer Course
- Android App Development Specialization
- Postman API Fundamentals Student Expert

Projects

❖ GradNet – Graduate's Network

- Developed a **Kotlin** app using **Android SDK, Jetpack Compose, Copose Multiplatform** and **MVVM Architecture** with **Material Design** for job and candidate matching.
- Integrated **RESTful APIs, Retrofit, Room Database, Firebase (Auth, Firestore)**, and **GraphQL** for real-time secure data handling.
- Implemented **Coroutines, Dagger/Hilt, Git, CI/CD, WorkManager** with **JUnit/Espresso** testing and **App Modularization**.

❖ Caller – iPhone Style Dialer

- Built a **Kotlin-based Android SDK** dialer app using **Jetpack Compose, XML Layouts, MVVM Architecture**, for iOS-style UI.
- Integrated **Firebase, RESTful APIs, Retrofit, Room Database**, and **GraphQL** for contacts, calls, and analytics.
- Enhanced performance using **Coroutines, WorkManager, Jetpack Navigation, App Modularization, Dagger/Hilt, CI/CD, JUnit/Espresso**, and **ProGuard/R8** within **Agile/Scrum** workflow.
